Indraprastha University, India

June 2013

WHY HIRE?

Over the years while designing, I've developed a passion for creating engaging, delightful and interactive experiences. I've learned to design with a consistent system in mind and re-use components for a faster turnaround. I have in-depth experience working within e-commerce, enterprise and large-scale product domains. My go-to toolset includes Sketch app, Zeplin, HTML/CSS/JS, InVision, Principle, Keynote and FramerJS.
