June 2013

WHY HIRE?

Over 2 years of designing experience, I've developed a passion for creating engaging and interactive products. I've learned to design with a consistent system in mind and re-use components for a faster turnaround. I have in-depth experience working within e-commerce, enterprise and large-scale product domains. My go-to toolset includes Sketch app, Zeplin, HTML/CSS/JS, InVision, Principle and FramerJS.
